Total for all Families

171 confirmed of 318 species reported present

Nomenclature follows information retrieved November 18, 2007, from the Integrated Taxonomic Information System on-line database, <http://www.itis.gov>.

A species is considered confirmed if it meets one of the following criteria:

- 1) herbarium collection
- 2) observed or cited by at least two independent individuals or publications
- 3) observed by the same individual in at least two years
- 4) observed at least three times by the same individual in a single year
